

TEILNAHMEZERTIFIKAT

VON  Anatoly Zelenin

Apache Kafka for Developers

Kurs

17. - 19. September 2024

Datum

Sydney Nguyen

Name

A stylized, handwritten signature in black ink, consisting of a large loop and a smaller loop, positioned above a horizontal line.

Unterschrift

Fortgeschritten **Developer** Training

Day 1: "Hello World" with Kafka

We will learn the basic concepts of Kafka development and discover how to develop performant and reliable applications in the coding challenges.

Day 2: Stream Processing with Kafka Streams

In the numerous labs of the day, we develop services based on Kafka Streams: from simple stateless operations to complex services with local state.

Day 3: Ready for production

Based on what we have learned in the first two days, we will look at the components necessary for successful development, fluency and how to support our operators in production with Kafka.

FRESH FUEL FOR DEVELOPERS

FOKUS

How do we produce and consume messages? Producer and consumer; first programming challenges

How do we develop reliable and fast applications Performance tuning and transactions

What are the important tools? Introduction to all relevant development tools

FOKUS

How do we connect Apache Kafka to third-party systems? Kafka Connect; development of own connectors

How do we develop using Kafka Streams? How do we transform Kafka from a simple message queue to a full-fledged streaming platform?

FOKUS

Patterns & Best Practices How can we make our Kafka life easier, and which tools already exist?

Kafka applications in production What to look out for and how can developers and administrators sleep soundly at night?
